SUMMARY

Motivated Junior Software Developer with hands-on freelance experience building responsive web applications, POS systems, and business websites for startups and small businesses. Skilled in both frontend and backend development, including desktop application development using HTML, CSS, JavaScript, Astro, React.js, Node.js, SQL Server, Java Swing, and C# WinForms. Strong foundation in software development principles, UI/UX implementation, API integration, and client collaboration. Recognized for academic excellence, leadership experience, and continuous learning in modern technologies.

TECHNICAL SKILLS

Programming Languages

- JavaScript
- Python
- Java
- C#

Frontend Development

- React.js
- Next.js
- Vue.js
- Astro
- HTML5
- CSS3
- Tailwind
- Bootstrap

Backend & Database

- Node.js
- ASP.NET Core Web API
- SQL Server
- MySQL

Desktop Development

- .Net C#, WinForms
- Java Swing

Tools & Technologies

- Git
- Unix
- Visual Studio Code
- Visual Studio
- Canva
- Figma

LANGUAGES

- English
- Tagalog

EDUCATION

STI College Ortigas-Cainta

- Mobile App and Web Development (MAWD)
- Senior High School | Graduated 2022
- GWA: 1.25

STI College Ortigas-Cainta

- Bachelor of Science in Information and Technology (BSIT)
- Completed foundational coursework

EXPERIENCE

Freelance Software Developer

Remote | 2021 - Present

- Developed POS systems using C# WinForms, Java Swing, and SQL Server for small business operations including inventory tracking and sales management.
- Built responsive landing pages and websites for startup businesses including local clothing brands, coffee shops, and real estate services.
- Implemented modern UI designs using React, Astro, Next, Vue, HTML, CSS, and JavaScript
- Collaborated with clients to gather requirements, improve user experience, and deliver functional solutions
- Improved application performance by 25% and reduced bug reports by 40% through meticulous debugging and optimization of existing codebases

PROJECTS

POS Management System

Tech Stack: C# WinForms, ASP.NET Core Web API, SQL Server

- Created a desktop-based POS application with inventory management, sales tracker, and transaction processing features
- Designed database structures for efficient sales and product tracking

Business Landing Pages

Tech Stack: React, Next.js, Vue.js, Node.js, Tailwind, Bootstrap

- Developed responsive and mobile-friendly landing pages for startup businesses
- Focused on performance optimization and modern UI/UX design

Web Application Projects

Tech Stack: React, Next.js, Vue.js, Node.js

- Built frontend interfaces and dynamic components for various practice and freelance projects
- Integrated APIs and reusable UI components to improve maintainability

Business Management API

Tech Stack: ASP.NET Core Web API, C#, SQL Server

- Designed and implemented scalable REST APIs that increased transaction handling capacity by 30% for multiple startup clients
- Integrated SQL Server database for data persistence and reporting
- Implemented authentication, routing, and backend service architecture
- Connected API services with fronted application for real-time data handling
